

Studio Desk – your personal office desk

With its minimal design and discreet cable management, our Studio Desk makes a great compact workstation. It's an ideal fit for home working or as an individual desk in your workplace. By bringing multiple desks together you can also make larger workbenches, perfect for seating teams or groups.

We've designed a sneaky route inside the leg to hide your messy power cables out of sight as they travel from the floor into the removable cable tray. They magically reappear beneath a flush-fitting cable cover in the desktop giving you quick and easy access to power.

Studio comes with a plain cable cover as standard, and if you like your desk clutter free we also have a smartphone and tablet stand version available on request.

Studio flat-packs in minutes for easy storage and transportation.

Designed and shared openly by:

Joni Steiner

Materials

All Opendesks are made from quality, FSC-certified baltic plywood. Coming from managed forestry it's good to know your desk was sustainably grown.

Designer

Designed and shared openly by:

Joni Steiner

Joni is a qualified architect and designer with the YAYA shortlisted architecture and strategic design firm 00:/ (zero zero). Part of the TED Prize winning WikiHouse design team, he was Lead Designer for Bristol Urban Beach, offices for the Association of Photographers and the RIBA Award winning Manor Works enterprise & community centre in Sheffield. Joni developed the original range of open-source furniture for Mint Digital and Hub Westminster and continues to evolve this with Opendesk.

Despite his background working on cultural and civic projects, Joni likes nothing better than getting his hands dusty in a CNC shop.
